

NORTHRIDGE METAL FABRICATORS

COMPANY INFORMATION

Northridge Metal Fabricators was founded in 2003 with one idea in mind; to assemble a team of highly motivated and highly skilled tradesman to provide top notch service and quality products to the Automotive Industry across North America.

Located in New Lowell Ontario, we are ideally situated to service Southern Ontario, and our proximity to the main arteries leading to Toronto and the United States border allow us to distribute our products across the continent.

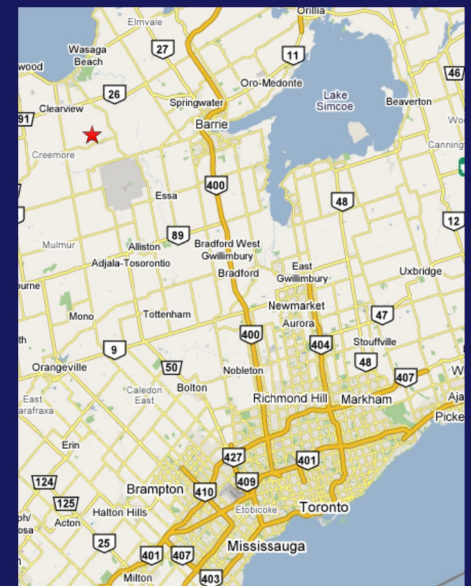

High volume production is the main focus of Northridge Metal Fabricators. We pride ourselves on high output and fast turn around allowing us to keep pace with the Automotive Industry.

4 ACRE PRODUCTION FACILITY

Our 4 acre production facility houses a staff of 20 Fitters, Welders and related personnel. Our highly flexible workforce routinely operates on 2 shift with the ability to extended to a third shift for 24 hour production to meet even the tightest of deadlines.

Design Phase

Our team of designers have years of experience in the metal fabrication industry. From initial concept through final production drawings we pride ourselves in finding innovative and cost effective solutions to all design problems. We bring many years of experience dealing with Ergonomic, Logistic, and Safety related design challenges. This experience and our use of state-of-the-art Computer Assisted Design (CAD) workstations and enables us to simulate and refine the function of, as well as predict and eliminate problems concerning the final product before the first piece of steel is cut.

Prototyping Phase

When the time has come to advance from the concept to a fully functioning fabrication, our tradesman have the skills to do the job. With strict attention to detail at this stage we are able to ensure that we provide our customers with the best possible product and that all design requirements are met.

LET OUR DESIGN TEAM TAKE YOUR IDEAS AND MAKE THEM A REALITY!

IN-HOUSE SERVICES

At Northridge we are able to give our customers the benefit of our years of experience in the industry and provide a wide range of services. Though our specialty is Automotive Racking, Northridge has invested heavily in the equipment, technology and manpower required to tackle variety steel fabrication and related projects. Speed of service is one area in which Northridge excels and we pride ourselves in being able to provide our customers with quick turnaround on all projects that come our way.

- Rack Inspection & Repair
- Prototyping Service
- Production Welding
- Custom Fabrication
- Steel Sales
- Custom Cutting
- Custom Metal Forming
- Mezzanines, Cat-walks & Safety Barriers
- Millwright Services
- Rack Modifications
- Custom Laser & Plasma Cutting
- Production Tube Bending
- Dunnage Design & Sales
- Caster Supply
- Production Sheet Metal Shearing & Forming
- Production Painting & Stenciling

One of our most heavily sought after services is on-site rack modification and repair. With companies investing so heavily in racking these days it is of prime importance to get long term returns on their investment. Many times this requires that packaging be repaired rather than scrapped or modifying a current model rack to accommodate next generation parts. With our Mobile repair facilities we are able to set up on-site and complete any repair or modification quickly and accurately. We pride ourselves on our quick response to on-site projects. Wether it's dealing with an urgent safety concern or limiting the time your packaging is out of the system, timely service is a primary concern! Our on-site work crews are fully trained and certified for working in a wide variety of industrial situations. We are fully equipped to operate in any location, wether that is outdoors, in-doors or even line side. We strive to adapt our response to reduce any impact on our customers daily routine.

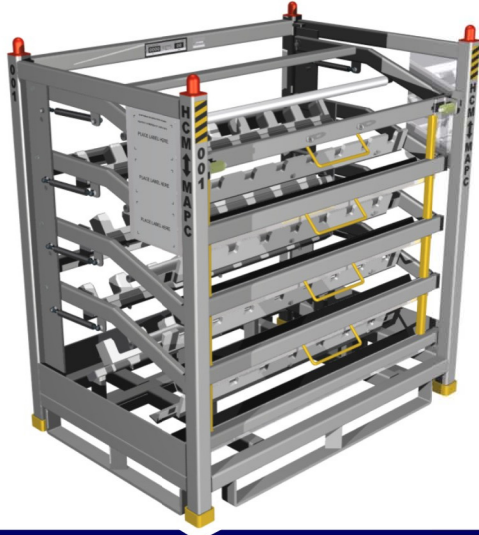

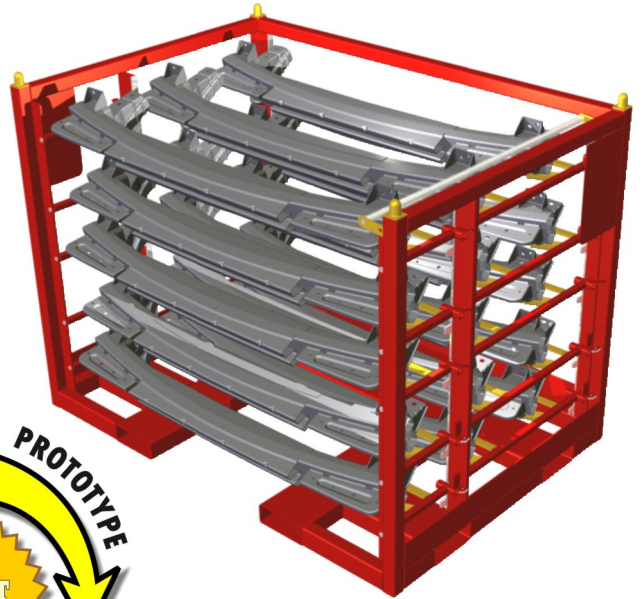

ON-SITE SOLUTIONS

The Design & Production of Automotive Racking is the primary focus of Northridge Metal Fabricators. Our team is constantly searching for new methods and materials to provide our customers with the highest quality product at the lowest possible price. Our Design and Prototyping team has years of experience in Automotive packaging and are ideally suited to overcome the unique challenges associated with the storage and transportation of automotive components.

PLANT INFRASTRUCTURE

NORTHRIDGE METAL FABRICATORS PROVIDES A FULL SERVICE SOLUTION FOR A WIDE VARIETY OF INDUSTRIAL INFRASTRUCTURE PRODUCTS. WE OFFER DESIGN, BUILD & INSTALLATION

MEZZANINES & CAT-WALKS

Our custom designed Mezzanines & Cat-walks are all Engineer certified for strength and durability. We aim to match our customers existing appearance to provide seamless integration with existing structures.

SAFETY BARRIERS

We provide our customers with single unit and complete barrier systems designed to suit any plant layout. In addition we provide a barrier installation service including Core Drilling if required.

SAFETY CAGES & FENCING

We offer a flexible bolt together system which can be adapted to any plant layout. Man doors and Fork Truck access doors can all be accommodated. Our system allows for virtually any height of fence and the ability to tie in to existing plant structures for additional structural support.
